EXPERIENCE

Lumist.ai - AI-Powered SAT Prep Platform

Tampa, Florida

Co-Founder

Jan 2024 – Present

- Led product pivot from offline tutoring (\$50K ARR) to an AI-powered SAT platform at \$6–10/mo, acquiring 1,500+ users and 100 paying customers in 2 months (4% conversion).
- Diagnosed low AI Tutor adoption (24 DAU) via Supabase **SQL** analysis and 1:1 user interviews; led a guided-onboarding redesign that grew usage to 150+ DAU.
- Analyzed marketing-channel ROI to cut underperforming spend and consolidate a 14-person team to an 8-person org, reducing monthly burn.

University of South Florida

Tampa, Florida

ERP Analyst I

Jan 2025 – Present

- On-call data analyst for the Unit4 ERP (Coda) finance system: write ad-hoc **SQL** against a replica database to fulfill stakeholder requests for vendor, transaction, general-ledger/FP&A, and user-access reporting.
- Built a **Power BI** access-review report with row-level security mapping Unit4 user groups to 40+ clinical and finance divisions (multi-CTE SQL with OUTER APPLY and STRING_AGG), replacing a manual access audit.
- Wrote advanced SQL (CTEs, INTERSECT, window functions) to audit vendor master data, flagging never-paid, foreign-address, and cross-entity open/closed vendors; delivered 7+ automated FP&A reports saving ~5 hrs/week.

VNG Corporation

Ho Chi Minh, Vietnam

Data Analytics Intern

Jun 2024 – Aug 2024

- Built a Python optimization model that cut revenue-forecast variance from **20% to 4%** for a \$2M game launch; adopted into the production forecasting workflow and still in active use.
- Resolved 15+ data-pipeline tickets on missing/incorrect data with PySpark, SparkSQL, and Apache Airflow; built a **Tableau** heatmap to surface anomalies for the team lead.

Deloitte

Hanoi, Vietnam

Risk Advisory Intern

May 2023 – Jul 2023

- Built 4 **Tableau** dashboards and compliance reports with Oracle BI Publisher, enabling client leadership to track audit status in real time.
- Ran system-integration testing on a state bank's compliance platform across 160+ scenarios, logging 10+ defects and compiling findings into a 50+ page requirements document.

PROJECTS

E-Commerce Customer & Revenue Analytics | SQL, Python, pandas, Tableau [GitHub](#) | [Case Study](#)

- Cleaned **1.07M rows** of real UK e-commerce data (UCI Online Retail II); ran SQL RFM segmentation + cohort retention on £19.6M across 5,852 customers: "Champions" are 25% of buyers but **69% of revenue**.

Vendor & AP Spend Analytics | SQL, Power BI, Tableau [GitHub](#) | [Case Study](#)

- Advanced SQL (CTEs, window functions, INTERSECT) + a Power BI dashboard over a \$7.2B two-entity ERP AP ledger: **38% of spend in 10 vendors**; flagged 561 never-paid / 207 foreign / 118 cross-entity vendors to clean up.

Lumist Growth Analytics | SQL, Python, Tableau [GitHub](#) | [Case Study](#)

- Cleaned 151 free-text acquisition labels into 7 channels, then ran SQL cohort/funnel/conversion analysis on 5,500 students to prove volume ≠ value (top channel 5.4% vs 33%); memo to rebalance ad spend.

EDUCATION

National Louis University | GPA: 4.00

Tampa, Florida

M.S. in Business Data Analytics

Jan 2026 – May 2027

University of South Florida | GPA: 3.98

Tampa, Florida

B.S. in Business Analytics & Information Systems

Aug 2021 – Dec 2024

Honors: Dean's List (7 semesters), USF Green & Gold Presidential Scholarship, KPMG Case Competition 2023 Finalist

SKILLS

Technical: SQL (CTEs, window functions), Python, pandas, scikit-learn, Tableau, Power BI, Excel, SQLite, Git

Analytics: Cohort analysis, funnel & conversion analysis, retention/churn, forecasting & time-series, A/B testing, data cleaning/ETL, KPI dashboards, data visualization, stakeholder reporting
