EXPERIENCE

Lumist.ai - AI-Powered SAT Prep Platform

Tampa, Florida

Co-Founder

Jan 2024 – Present

- Led product pivot from offline tutoring (\$50K ARR) to an AI-powered SAT platform at \$6–10/mo, acquiring 1,500+ users and 100 paying customers in 2 months (4% conversion).
- Diagnosed low AI Tutor adoption (24 DAU) via Supabase **SQL** analysis and 1:1 user interviews; led a redesign with guided onboarding that grew usage to 150+ DAU.
- Designed a lead-scoring CRM with a 5-factor prioritization algorithm and automated Jira routing; processed 1,000+ leads, eliminating manual triage.
- Analyzed marketing-channel ROI to cut underperforming spend and consolidate a 14-person team to an 8-person org, reducing burn.

University of South Florida

Tampa, Florida

ERP Analyst I

Jan 2025 – Dec 2025

- Owned Unit4 FP&A Lite rollout: gathered requirements and delivered 7+ automated reports saving ~5 hrs/week; authored 75+ job aids and triaged 1,000+ Jira tickets across 3 enterprise systems at 95% SLA.

VNG Corporation

Ho Chi Minh, Vietnam

Data Analytics Intern

Jun 2024 – Aug 2024

- Built a Python optimization model that cut revenue-forecast variance from **20% to 4%** for a \$2M game launch; adopted into the production forecasting workflow and still in active use.

Deloitte

Hanoi, Vietnam

Risk Advisory Intern

May 2023 – Jul 2023

- Built 4 **Tableau** dashboards and compliance reports with Oracle BI Publisher, enabling client leadership to track audit status in real time.

PROJECTS

DebateLab Analytics | SQL, Python, pandas, Tableau [GitHub](#) | [Case Study](#)

- Wrote SQL (CTEs, window functions, cohort logic) and pandas over 52K+ practice sessions to analyze skill-improvement curves, retention cohorts, and a signup→activation→premium funnel; found engagement depth drives conversion and recommended a week-1 activation program.

Lumist Growth Analytics | SQL, Python, Tableau [GitHub](#) | [Case Study](#)

- Cleaned 151 free-text acquisition labels into 7 channels, then ran SQL cohort/funnel/conversion analysis on 5,500 students to prove volume ≠ value (top channel converted 5.4% vs 33%); delivered a memo to rebalance ad spend and prioritize activation.

Revenue Forecasting (Game Launch) | Python, scikit-learn, pandas [GitHub](#) | [Case Study](#)

- Engineered lag/seasonality/marketing/event features and a gradient-boosting model; a leakage-safe walk-forward backtest cut forecast error from ~22% to ~**4.5% MAPE**.

EDUCATION

National Louis University | GPA: 4.00

Tampa, Florida

M.S. in Business Data Analytics

Jan 2026 – May 2027

University of South Florida | GPA: 3.98

Tampa, Florida

B.S. in Business Analytics & Information Systems

Aug 2021 – Dec 2024

Honors: Dean's List (7 semesters), USF Green & Gold Presidential Scholarship, KPMG Case Competition 2023 Finalist

SKILLS

Technical: SQL (CTEs, window functions), Python, pandas, scikit-learn, Tableau, Power BI, Excel, SQLite, Git

Analytics: Cohort analysis, funnel & conversion analysis, retention/churn, forecasting & time-series, A/B testing, data cleaning/ETL, KPI dashboards, data visualization, stakeholder reporting
